SKILLS

- Programming Languages:** Java, JavaScript, TypeScript
- Core CS Fundamentals:** Data Structures & Algorithms, OOPS, DBMS, LLD
- Web Technologies:** HTML, CSS, React.js, Node.js, Express.js, Next.js, JQuery
- Databases:** SQL, MongoDB
- Tools & Version Control:** Eclipse, Visual Studio Code, Git

PROJECTS

First Sketch Concepts | React.js, Node.js, Express.js, MongoDB Tailwind CSS, REST API | [GitHub](#) Dec 2025 - Jan 2026

- Designed and developed a fully responsive, mobile-first business website using React.js and Tailwind CSS, ensuring consistent UI across all screen sizes and devices.
- Built reusable, component-based UI architecture in React.js, separating concerns across layout, navigation, service showcase, and portfolio gallery components for maintainability and scalability.
- Implemented secure and scalable backend APIs for handling user interactions, form submissions, and persistent data storage.
- Modeled MongoDB collections for client inquiries and portfolio content, enabling structured storage and easy content retrieval without manual file management.

Hotel Booking and Management | React.js, Node.js, Express.js, MongoDB, REST API | [GitHub](#) Jul 2025 - Aug 2025

- Built a full-stack hotel booking platform, enabling end-to-end room search, availability checks, and booking management.
- Integrated search and filter functionality allowing users to query hotels by location, price range, and room type, improving discoverability and booking conversion.
- Applied middleware for input validation, error handling, and request logging across all API routes, reducing runtime errors and improving API reliability.
- Designed and implemented MongoDB schemas for users, hotels, rooms, and bookings with relational references, enabling complex queries like date-based availability filtering.

TRAINING

Skill Development (LPU)

Jun 2025 - Jul 2025

Mastering Data Structures and Algorithms

- Gained strong proficiency in core data structures such as arrays, linked lists, stacks, and queues with hands-on implementation focused on real-world use cases and efficient memory usage.
- Developed an educational sorting algorithm project with step-by-step visual breakdowns, helping beginners understand time complexity differences between sorting techniques.

CERTIFICATES

- | | |
|---|----------|
| Advanced React Coursera | Oct 2025 |
| Java Programming IamNeo | May 2025 |
| Cloud Computing NPTEL | Apr 2025 |
| Mastering Data Structure and Algorithms Udemy | Jul 2024 |

ACHIEVEMENTS

- Demonstrated proficiency with core data structures in Java including arrays, linked lists, stacks, queues, and trees for algorithmic problem-solving.
- Successfully solved over 200 Data Structures and Algorithms (DSA) problems on platforms such as LeetCode and GeeksforGeeks, demonstrating strong coding efficiency and problem-solving capabilities.

EDUCATION

- | | |
|--|--------------------|
| Lovely Professional University | Phagwara, Punjab |
| Bachelor of Technology - Computer Science and Engineering: | Aug 2023 - Present |
